Corporate Licensing

Organisations often need more than one WebOffice site to meet their company, departmental and project communication / collaboration needs. With corporate licensing we have made managing multiple sites simple by giving you:

- **Single member billing:** This allows a user to be a member of multiple sites and only be charged once.
- **Consolidated site invoicing:** This means that you only get one invoice for all your sites to simplify accounting and tracking.
- **Site branding:** Enables your own branding to be added to each site automatically.
